```
=== IoT Device Network using DFS ===
Enter number of IoT devices: 6
Enter device names (one word each):
Device 1: sensor1
Device 2: sensor2
Device 3: sensor3
Device 4: smartlight
Device 5: gateway
Device 6: camera
Enter number of communication links: 5
Enter each link as two device names:
Link 1: sensor1  sensor2
Link 2: sensor2 sensor3
Link 3: smartlight camera
Link 4: gateway sensor1
Link 5: sensor3  smartlight

IoT Network (Device: Connected devices)
sensor1: sensor2, gateway
sensor2: sensor1, sensor3
sensor3: sensor2, smartlight
smartlight: camera, sensor3
gateway: sensor1
camera: smartlight

Enter starting device for DFS: sensor1

DFS traversal from sensor1: sensor1 sensor2 sensor3 smartlight camera gateway
Reachable devices: 6
